What NOT to Call These Products

Don't Say	Say Instead
"LLM" or "language model"	"AI assistant" or "smart assistant"
"API integration"	"It connects to their tools"
"Knowledge base"	"We teach it about their business"
"Vector embeddings"	(Never say this)
"Prompt engineering"	"We train it to respond like them"
"Node.js / Astro / Vercel"	"Modern technology that's fast and secure"

Common Objections & How to Handle Them

"Isn't AI complicated?"

That's thething - youdon't see it. We set it up, you just use it. Like a smart phone. You don't need to know how it works to use it.

"I don't want to lose the personal touch."

You control everything. You decide what the AI says, when it transfers to you, and what it does. It makes you MORE present for the important stuff.

"Can't I just do this myself with ChatGPT?"

ChatGPT is a blank page.This is custom-built for YOUR business - it knows your prices, your services, your clients. That's like comparing a bicycle to a car with GPS.

"It's expensive."

Compare it to a human assistant: $30,000/year salary vs $1,297 one-time. It pays for itself in the first month of time saved.

Commission Structure (Your Side)

This part we discuss one-on-one.The short version:

- **You earn a one-time 10% commission on every setup you sell**
- **You earn monthly residuals on retainer clients - stacked as you bring more**
- **We handle everything after the sale: build, deploy, support**
- **You get paid when the client pays**
- **No cap on residuals - the more clients you bring, the more you make**

You introduce, we close.

Your Pitch Script (30 Seconds)

"My partner Birky Studio builds AI assistants that run your business in the background. They answer calls, respond to WhatsApp, manage emails, update your CRM - everything that's eating your time.

It's a one-time setup, works in English and Spanish, and costs less than a dinner out per month. Want me to introduce you?

Short, clear, no jargon. Easy.

Let's book you for a video call with Luna Jerney and discuss!
