

Birky Studio

Partner Sales Brief

Simple explanations for non-techy sales partners

You don't need to know how AI works. You just need to know what problems it fixes.

Quick Summary

What	Price	Type	Best For
AI Agent Setup	\$1,297	One-time	Real estate agents, busy owners
AI Voice Receptionist	\$550	One-time	Biz that miss phone calls
AI Text Receptionist	\$297	One-time	Biz that miss WhatsApp msgs
Business AI Retainer	\$197/mo	Monthly	Ongoing training + builds
Basic Support	\$29-49/mo	Monthly	Maintenance & tweaks
Websites	\$499-\$1,999	One-time	Anyone needing a site

The Products (Plain English)

AI Agent Setup - \$1,297

What it does:

A custom AI assistant that lives on the client's computer. It knows their business, their clients, their prices, and their processes. It can:

- Answer emails and draft replies
- Search for properties, products, or info
- Manage their CRM / client database
- Write social media posts, listing descriptions
- Work on WhatsApp, Telegram, and email
- Speak English AND Spanish

Who needs it:

Real estate agents, consultants, business owners overwhelmed by emails, follow-ups, admin work. People who say "I don't have enough hours in the day."

How to sell it:

"Imagine having an assistant who knows your business inside-out, works 24/7, never calls in sick, and costs less than a monthly phone bill. That's what this is."

What's included:

Setup, knowledge base building (teaching the AI about their business), Notion CRM (if real estate), training call. 3 months basic support included.

AI Voice Receptionist - \$550 setup

What it does:

An AI that answers phone calls 24/7. Natural voice, bilingual. It:

- Greets callers professionally
- Answers FAQs (hours, pricing, location)
- Qualifies leads (asks questions, captures info)
- Transfers urgent calls to the client's phone
- Takes messages and sends them as text

Who needs it:

Any business that misses calls. People who say "I keep missing calls when I'm busy with a client."

How to sell it:

"How many calls did you miss today? Each one is a lost customer. For a one-time setup fee, your phone is answered 24/7. Never miss a lead again."

Extra cost:

Client pays Vapi (the voice provider) ~\$30-50/month for actual call minutes. Like paying a phone bill instead of a salary.

AI Text Receptionist - \$297 one-time

What it does:

AI that responds to WhatsApp messages and website chats automatically. 24/7, bilingual.

- Answers questions about services, pricing, hours
- Captures lead info (name, phone, email)
- Books appointments
- Takes messages when the business is closed

Who needs it:

Small businesses drowning in WhatsApp messages or losing leads after hours. Shops, restaurants, service businesses.

How to sell it:

"Your customers are messaging you on WhatsApp at 9pm. Are you answering? For \$297 one-time, an AI handles all those messages for you."

Websites - \$499 to \$1,999

Key features:

- Mobile-first (looks great on phones)
- Bilingual (English + Spanish)
- SEO optimized (shows up on Google)
- WhatsApp chat built-in
- Delivered in 3 days (not 3 months)

Tiers:

Tier	Price	Pages	Best For
Starter	\$499	1-3	New businesses, simple info
Professional	\$999	4-7	Growing businesses
Premium	\$1,999	10+	Established businesses

How to sell it:

"Their website is their digital storefront. If it's slow, ugly, or doesn't work on phones - they're losing customers. We build beautiful bilingual sites in 3 days."

Business AI Partner Retainer - \$197/mo

What it includes:

- Monthly 1-hour strategy/training call
- Monthly performance report (leads, time saved)
- 1 custom automation or new feature per month
- Quarterly deep-dive planning session

Who needs it:

Clients who want their AI to keep improving. Businesses that want to stay ahead.

How to sell it:

"Their AI doesn't stop at setup. Each month we make it smarter - new features, better automations, more time saved. It's like a monthly tune-up for their business."

What NOT to Call These Products

Don't Say	Say Instead
"LLM" or "language model"	"AI assistant" or "smart assistant"
"API integration"	"It connects to their tools"
"Knowledge base"	"We teach it about their business"
"Vector embeddings"	(Never say this)
"Prompt engineering"	"We train it to respond like them"
"Node.js / Astro / Vercel"	"Modern technology that's fast and secure"

Common Objections & How to Handle Them

"Isn't AI complicated?"

That's the thing - you don't see it. We set it up, you just use it. Like a smart phone. You don't need to know how it works to use it.

"I don't want to lose the personal touch."

You control everything. You decide what the AI says, when it transfers to you, and what it does. It makes you MORE present for the important stuff.

"Can't I just do this myself with ChatGPT?"

ChatGPT is a blank page. This is custom-built for YOUR business - it knows your prices, your services, your clients. That's like comparing a bicycle to a car with GPS.

"It's expensive."

Compare it to a human assistant: \$30,000/year salary vs \$1,297 one-time. It pays for itself in the first month of time saved.

Your Pitch Script (30 Seconds)

"My partner Birky Studio builds AI assistants that run your business in the background. They answer calls, respond to WhatsApp, manage emails, update your CRM - everything that's eating your time. It's a one-time setup, works in English and Spanish, and costs less than a dinner out per month. Want me to introduce you?"

Short, clear, no jargon. Easy.

Commission Structure (Your Side)

This part we discuss one-on-one. The short version:

- You earn a one-time commission on every setup you sell
- You earn monthly residuals on retainer clients - stacked as you bring more
- We handle everything after the sale: build, deploy, support
- You get paid when the client pays
- No cap on residuals - the more clients you bring, the more you make

Your Next Step

Got a potential client in mind? Tell us and we'll send you:

- A link they can check out (birkystudio.com/partners)
- A 15-min intro call to walk them through it

You introduce, we close.
